

# Patient dashboard challenge

1. We have successfully build the login page, doctors recommendation page, patient page.
2. All the above mention pages are working and displayed but due to shortage of time this pages could not be connected to the login page.
3. The login page may not get validated, because the database is locally hosted.
4. We thought of adding map but since all the map providers are asking for credit card authentication, so we did not add the map.

## Assumption

1. We are assuming that we already have data for authentication and no user is being newly created.

## Workflow

## Authentication Page

## Fetch Data From DataBase

Dashboard Add Patient Report More Options Logout

## DASHBOARD

Add New Patient

Patient Details

prescription

Delete Patient

Edit Patient Details

User Reports

## Doctor Page

Dashboard Add Patient Report More Options Logout

### ADD NEW PROJECT

Project Title

Type

patient

specilaist

Physician

patient name

Description

### ADD NEW PATIENT

[Back](#)

## PATIENT DETAILS

Sr. No.	Unique	Name	Father Name	Mobile	Email
1	1	Mohd Nasir	Naseer Ahmad	876	nasir@gmail.com
2	2	Karunesh Gupta	Gupta	12345	karunesh@gmail.com
3	50	Ayushman Joshi	Deepak Joshi	41242345	ayushman@gmail.com

[Dashboard](#)[Add Patient](#)[Report](#)[More Options](#)[Logout](#)

### DELETE PATIENT

Patient Unique Id

[Search](#)

**DELETE PATIENT**

---

Patient Unique Id		Search
-------------------	--	--------

**phpMyAdmin**

Server: 127.0.0.1 » Database: onlinecourse » Table: login

name	email	pass
Mohd Nasir	nasir@gmail.com	123
Nauzhad	naushad@gmail.com	123
Nauzhad1	naushad@gmail.com	123
Ayushman Joshi	ayushman@gmail.com	123

## SQL SERVER

Screenshot of the MySQL Workbench interface showing the results of a query on the 'contact' table.

The left sidebar shows the database schema:

- New
- bugtrackingsystem
- college
- information\_schema
- mysql
- onlinecourse
  - New
  - contact
  - login
  - student
- performance\_schema
- phpmyadmin
- project
- test

The main panel displays the results of the query:

```
Showing rows 0 - 0 (1 total, Query took 0.0059 seconds.)  
SELECT * FROM `contact`
```

Query results:

name	email	contactnumber	address	subject	gender	occupation
Mohd Nasir	mohdnasir4257@gmail.com	2147483647	Dehradun	Course Registration related Issue	Male	Student

Query results operations:

- Print
- Copy to clipboard
- Export
- Display chart
- Create view
